

HOME & GARDEN SOLUTIONS

SHIP WITH CONFIDENCE.
YOUR IMAGE IS ON THE LINE.

Online ordering has changed the business landscape forever. We have come to expect – visibility, availability, flexibility and fast delivery. That means you are not only selling a product, but a customer experience, as well. It doesn't matter if you are selling tile flooring, lighting, bathroom fixtures or decorative pottery. How quickly and effectively you can fulfill customer expectations is the name of the game.

At Pregis IntelliPack, our customer promise is protecting your brand image.

IntelliPack foam-in-place protective packaging provides the highest degree of protection to prevent damage to fragile, heavy or odd shaped items. The foam molds around the product forming a customized protective shell around the item being shipped. It protects against shock, vibration and even rough handling by a parcel service.

But, choosing IntelliPack foam-in-place for your shipping needs does more for your business than just protect a product. It helps businesses like yours:

- Increase speed and reach to the customer by shipping via parcel service anywhere, anytime
- Reduce costs associated with damage / returns and provide a reliable method of re-packing products for returns that are in saleable condition
- Grow sales by accessing new channels to market and expanding your product offering
- Streamline operations by create packing consistency and labor efficiencies
- Meet demands of seasonal business trends & temporary employee training
- Exceed performance expectations established by your suppliers & customers

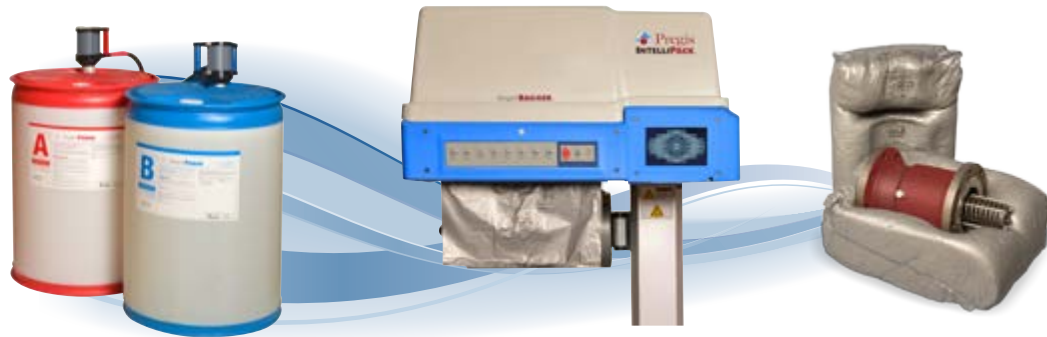

INTELLIPACK®

Foam-in-Place Systems with a High IQ™

HOW IT WORKS

Foam-in-place polyurethane is molded in real-time by combining two liquid foams in a high density polyethylene (HDPE) bag, film or a pre-fabricated mold. The mixture expands rapidly around the product being protected, creating a custom protective shell.

A & B Smartfoam liquids + IntelliPack equipment = custom foam packaging

Whether the need is protective void fill, blocking and bracing, cushioning, or pre-molded pads, IntelliPack systems feature the most cost-effective, time-efficient foam-in-place packaging technology in the industry.

FIVE DEGREES OF SEPARATION

Only Pregis IntelliPack offers the advantage of foam-in-place with our exclusive 5 Degrees of Separation:

- **TELEMETRY** enables proactive, preventative maintenance 24/7. Costly, unexpected downtime is an inconvenience of the past!
- **BAR-CODING** controls the amount of consumables. By removing the guesswork – materials and packaging components are better managed; pack consistency and line efficiency are improved.
- **EQUIPMENT** design is safe, intuitive, ergonomic and easy-to-use. A machine you can rely on. Changing parts takes only seconds!
- **CUSTOMER FOCUSED** means speed, service and satisfaction, guaranteed.
- **THE ADVANTAGE PROGRAM** enables us to customize our solutions for changing customer needs.
