Protective Packaging Solutions

THE COMPLETE SHIPPING MAILER GUIDE

PREGIS SHIPPING MAILERS

VALUE PROPOSITION

Pregis' complete family of mailers offers a practical, cost effective and quality method of guarding products from damage during shipment or transfer. Environmentally, Pregis mailers deliver great product protection and use less material versus other common packaging options such as corrugated cartons. This means increased source reduction, less waste discarded.

Mailer Advantages:

- Simple to stack, pack and close
- Delivery trucks are better utilized for lower transportation-related energy and fuel consumption.
- Takes up less storage space than corrugated cartons
- Eliminates the need for extra void fill materials and carton sealing tape
- Less material used to manufacture vs. alternative packaging, such as corrugate

THINK SUSTAINABILITY. THINK PREGIS.™

Environmentally responsible practices are an important part of Pregis' business philosophy. The purpose of our "green" family of products is to address the growing need for sustainable packaging alternatives.

For instance, Pregis Air-Kraft® mailers are manufactured with 25% post industrial content in the air cushion liner. Air-Kraft mailers reduce the weight of the total package through the use of air filled bubbles on the inside and high-quality kraft paper on the outside. These mailers offer very high BTU fuel content for communities where waste-to-energy programs are available. In addition, printed Air-Kraft mailers use water based inks as opposed to solvent-based options.

Pad-Kraft padded paper mailers are an environmentally preferable way to protect items during shipment. This all paper mailer is made with 100% recycled paper for the padding material and recycled paper exterior. Pad-Kraft mailers conserve our renewable resources and it can be easily recycled through curb side paper recycling programs.

- **Air-Kraft® mailers** feature an Astro-Cell® air cushioning liner that adds the right amount of cushioning and surface protection when mailing items susceptible to impact and abrasion during transit.

Armor-Lite® poly bubble lined mailers can be utilized to reduce overall weight and packaging dimensions, cutting shipping costs and reducing environmental footprint. This strong and durable poly-bag mailer provides optimum moisture, puncture and tear resistance.

- **Gator-Pak™ rigid mailers** are designed to protect products from bending and creasing and perfect for three-dimensional items. The fold construction provides side impact protection and superior side strength. Each mailer is made with 100% recycled content and offers superior puncture resistance.

- **Gator-Pak™ Lite mailers** are manufactured from a lightweight chipboard as an economical alternative to Gator-Pak mailers. Gator-Pak Lite mailers are easy to load and close, and easy for the recipient to open.

- **Pad-Kraft® 100% paper padded mailers** are an environmentally preferable way to protect items during shipment. These mailers are easily recycled. Pad-Kraft mailers are an inexpensive protective packaging option with excellent cushioning properties for reliable containment.

Poly-Lite® mailers three-layer film construction provides moisture- and puncture-resistance; exceptional tear and burst strength. The white outer layer enhances clean outer surface aesthetics. The Silver-Shield™ opaque inner security layer keeps contents confidential.

- **Tuff-Kraft® mailers** are made with a heavy-duty 100% paper linerboard, which is recyclable in mixed paper recycling programs. This mailer is also repulpable and biodegradable in compost facilities. Double-glued bottom flap uses nontoxic adhesive and contains 50% post-consumer recycled paper.

Streamline the process:

Mailers load and seal in 50% fewer steps. And, no additional materials, like tape, are needed.

Assemble box.

Fill box.

Add void-fill.

Tape to close.

Fill mailer.

Close.

First impressions:

Mailers are a cleaner alternative to other shipping materials.

Think Pregis.

At Pregis, our goal is to provide customers with a deep breadth of high quality, superior protective packaging solutions while remaining on the forefront of R&D and technology that will continually bring new, innovative protective packaging offerings to the marketplace. We are committed to incorporating and promoting business practices that respect both the earth and the environment.

Pregis Corporation is a leading global provider of innovative protective packaging materials and systems. The company offers solutions for a wide variety of consumer and industrial market segments including food, beverage, healthcare, medical devices, agricultural, e-commerce, retail, automotive, furniture, electronics, construction and military/aerospace.
