

FORM-IT™ SELF-STICK PE FOAM

Create custom protective cushioning and surface protection for varied and odd shaped items within your business with blocks or strips that stick to the box. Quickly trim foam strips from the roll, remove liner to expose the adhesive strip and affix to a product's container in the spots necessary to protect that particular item.

Whether packaging heavy fragile products or lightweight delicate items, there is a roll of Form-it cushioning foam profiles that will fit your need.

Features and Benefits:	Results:
Custom PE packaging created from standard items.	<ul style="list-style-type: none"> • Trim to necessary lengths to protect varied products. • Affordable and readily available standard inventory. • Decrease fabrication and design costs.
Easy to use.	<ul style="list-style-type: none"> • Just peel and stick to the interior of the product container. • Create custom dividers, U-channels, L-shapes, pockets, and brace and block.
3 thickness available to meet specific needs: Light, Medium and Heavy Duty.	<ul style="list-style-type: none"> • Form-It foam profiles have excellent load bearing, insulation, and impact absorption characteristics.
Rolled foam is available in multiple thickness and compression characteristics.	<ul style="list-style-type: none"> • Form-It is your universal go to packaging material. • By making it custom capable you are no longer constrained by cost or shape. • Rolls take up less inventory space than custom fabrications.

HOW IT WORKS:

Cut to length off of the roll of foam.

Peel the film liner off to expose adhesive.

Stick to the box interior where needed.

IDEAL APPLICATIONS:

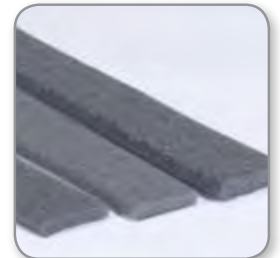

- Aluminum & steel panels
